# NORTHEASTERN OKLAHOMA A&M COLLEGE

MIAMI, OKLAHOMA

College Life At A Glance . . . .

# A MESSAGE FROM THE PRESIDENT . . . .

Dr. Bruce G. Carter

*Northeastern Oklahoma A. & M. College*  
BRUCE G. CARTER, PRESIDENT  
Miami, Oklahoma

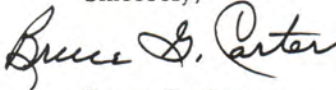

Northeastern A & M at Miami, like most of the other good colleges across the nation, is growing and developing quite rapidly. Forty-seven years ago, in 1919, the state legislature of Oklahoma created and made provisions for the establishment of a two year college at Miami. The college has grown and developed little by little until nearly two thousand students are enrolled at the present time.

Nine new buildings are currently under construction or will be under construction by the time this publication goes to press. These new buildings will allow for some of the finest housing in America, and they will also provide excellent classrooms, laboratories, and study outlets for many students.

Northeastern A & M has one of the best all-around academic programs that can be found any place in mid-America and also has one of the best extracurricular programs for students that is available in any junior college.

Of course, students are going to college during this day and age! Northeastern A & M would like for the student to give serious consideration to this college as his college home. The college is small enough to give the student personal attention and to know him, yet large enough to have a wide variety of curricular offerings.

Northeastern A & M welcomes the student.

Sincerely,  
  
Bruce G. Carter  
President

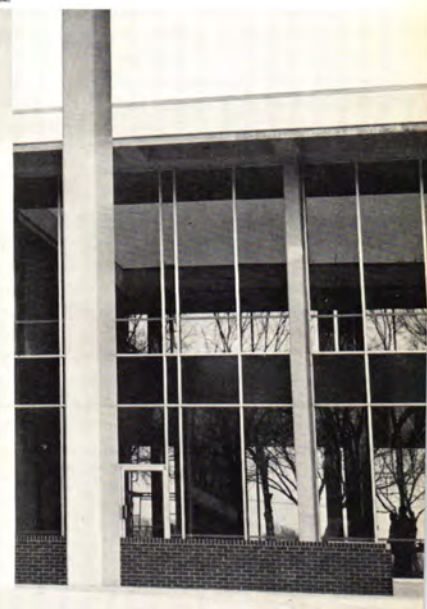

# PROGRESS

Dr. Bruce Carter and students stand in front of the spacious Vocational-Technical Building which has just been completed.

Dr. Carter explains the complex structure of the new dormitories, one for men and one for women, and points to the new married student housing being constructed.

Dr. Carter discusses the luxurious qualities afforded the student by the new Library-Administration Building which is near completion.

# ARTS BUILDING

The Arts Building houses the Business, Music, Art, Home Economics, and IBM departments. The structure is equipped with the latest and most modern equipment available.

Business students are taught to use office machines by proper supervision and use of modern equipment.

The Business department offers shorthand and typing for those students interested in professional training or a business major.

IBM affords a complete field of training for those students interested in this rapidly developing field. Students are able to employ modern equipment for this study area.

The most modern facilities are used to train students efficiently in business courses.

Art majors and students needing art requirements receive expert training in many levels of art. This training will satisfy any phase of art development.

Vocal music plays an important role in college life for many students. Chorus, quartets, and other groups provide training for participation in such activities as a college musical.

Individual supervision while cooking is one phase of home economics offered by the department. Five ultra-modern kitchens are employed as training facilities.

Students are offered training in various musical programs. The music department offers individual training in areas such as piano, violin, and voice.

One of the busiest groups on the campus is the college band. The band performs at multiple functions throughout the year.

Cunningham Hall houses the Agriculture, Chemistry, Science, and Electronics departments. The two story building is located on the northeast corner of the campus.

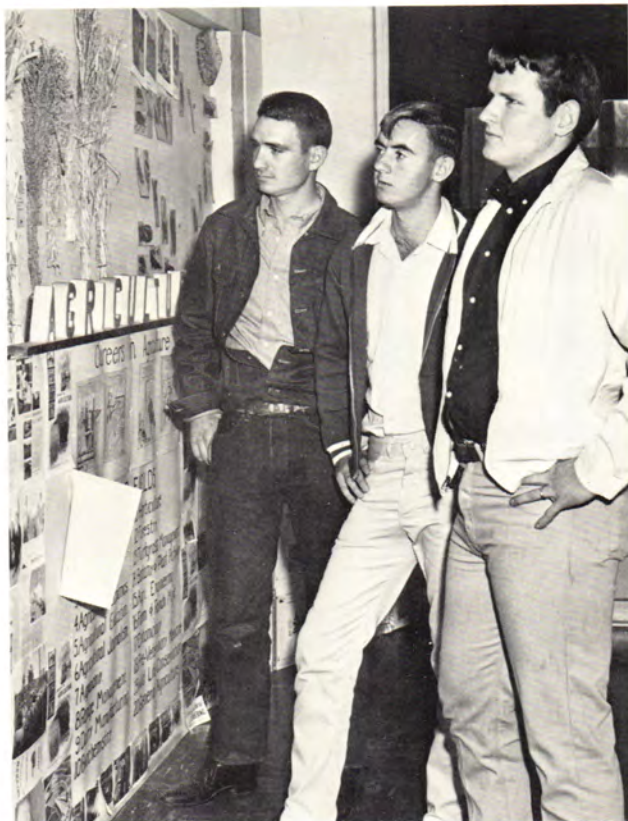

Botany students use microscopes to study fine detail of plant life. The science department offers a variety of studies in both botany and zoology.

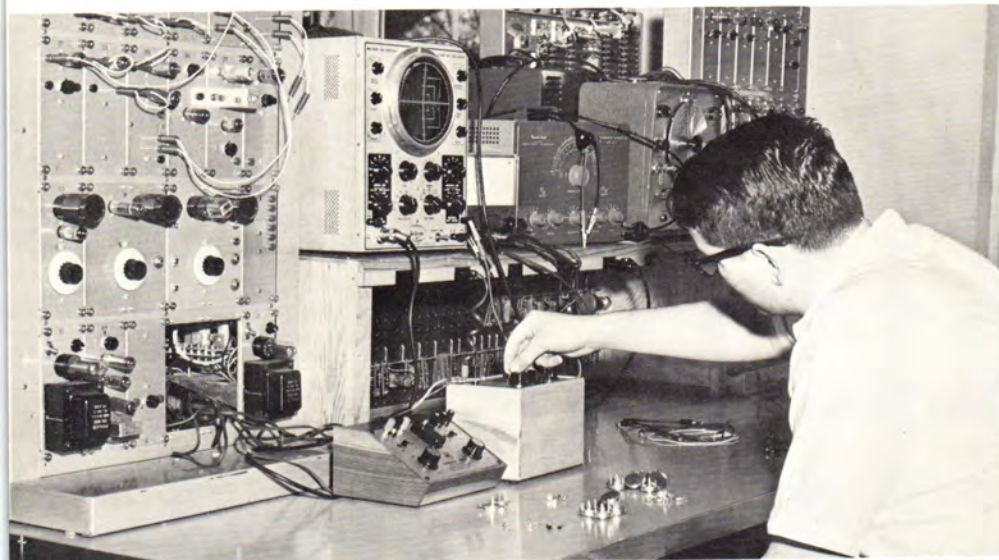

Earth science is one of the rapidly growing fields offered by the science department. Education majors use the course for a physical science requirement.

# CUNNINGHAM HALL

Agriculture students are offered the opportunity to become members of the nationally recognized judging teams trained by the agriculture department. Students choose from a variety of agriculture majors.

One of the most completely equipped departments on the campus is the electronics department. Students are trained by using modern electronics equipment.

The chemistry department provides an excellent background and gives the student laboratory time to apply the theory discussed during lectures.

# VANN HALL

One of the newest student housing units on the campus is Vann Hall. This modern and beautiful building is the home of 200 women students during the school term.

Opened in the fall of 1965, the dormitory is an attraction quickly noticed by guests and students on the campus.

The unit was named in honor of Miss Faye Vann, an instructor who devoted forty-one years of her life to Northeastern A&M.

Vann Hall is completely air-conditioned and equipped with the most modern conveniences.

Each floor has a lounge in which students may relax or study. The basement affords a game room. Each room is filled with modern furniture. Vann Hall is a pleasant building in which to live, with its clean and ultra-modern atmosphere.

The hostess is Gladys Purvis.

# SHIPLEY HALL

Shipley Hall houses the English, Speech, Drama, Mathematics, Drafting, Journalism, and Social Studies departments. The library and administrative offices are also located in the building. After completion of the Vocational-Technical Building and Library-Administration Building, it will house only English, math, journalism, and social studies.

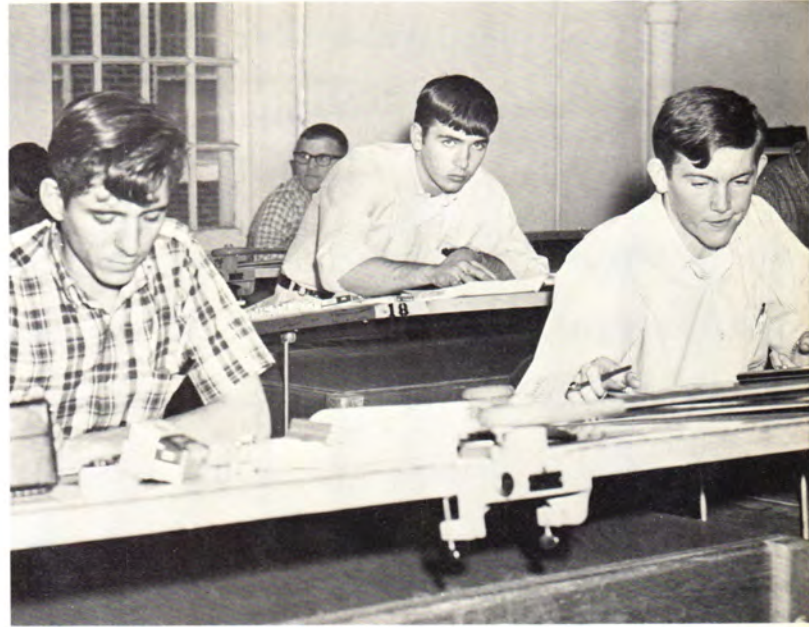

English classes involve all students who enroll at Northeastern A & M. Classes stress the ability to communicate as an essential for all students who plan a college career.

Mathematics plays an important role in the student's curriculum since this is a scientific age. Northeastern's math department is recognized as one of the leading departments for preparing the student adequately.

Drafting is an essential part of the engineering and vocational-technical fields. Students receive professional training and supervision in this area.

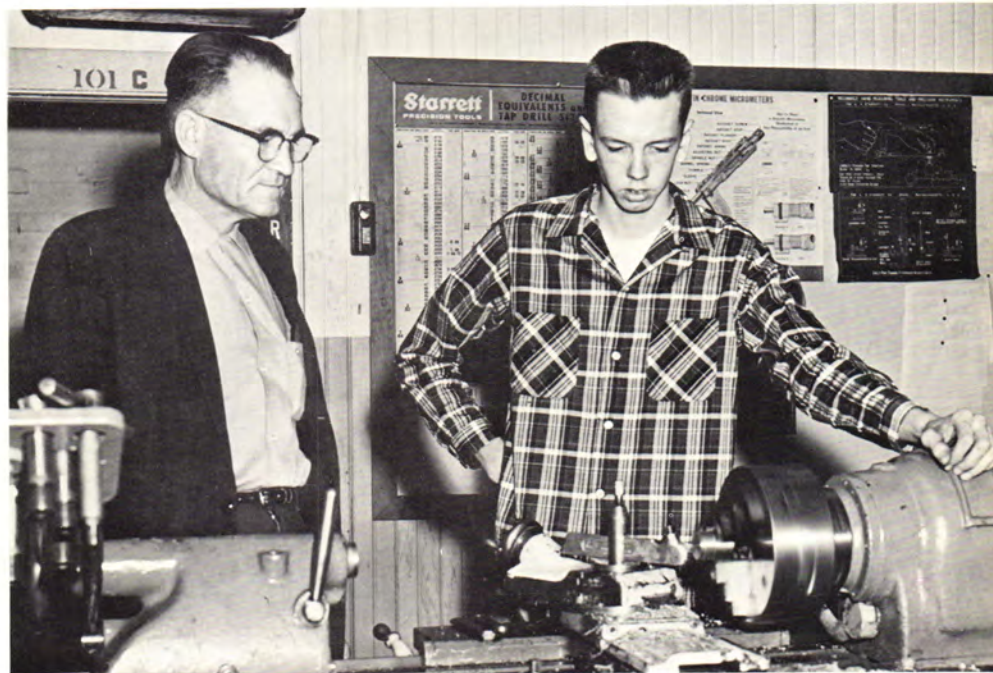

## TECHNICAL COURSES . . . .

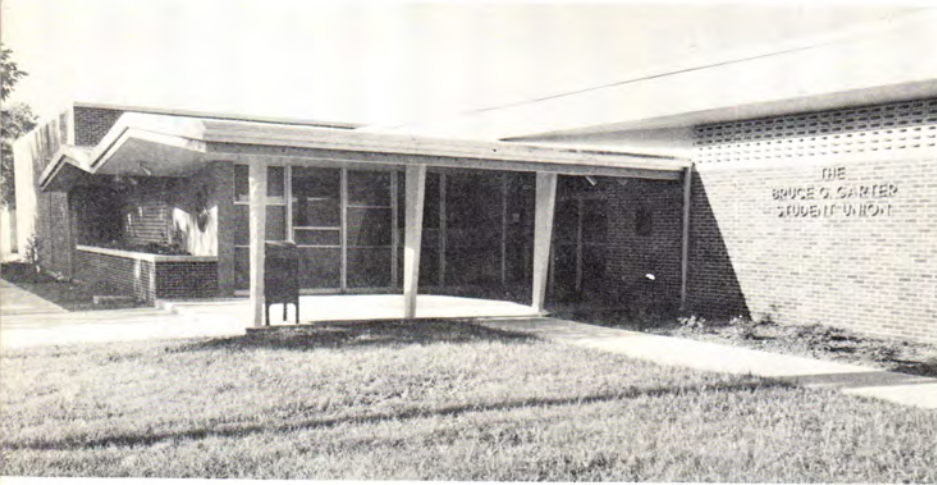

Welding is recognized as an essential in the vocational-technical field. Not only is this essential as a college field, but it has provided a training element for government programs.

Machine tooling is one of the areas of study offered a vocational-technical student. Also, training has been provided for government sponsored students.

# BRUCE CARTER STUDENT UNION

The Bruce G. Carter Student Union houses the post office, bookstore, game room, cafeteria, snack bar, and ball room. The building, named in honor of the college president, Dr. Bruce Carter, is the center of most college activities.

The snack bar provides continuous service for students, faculty, and visitors.

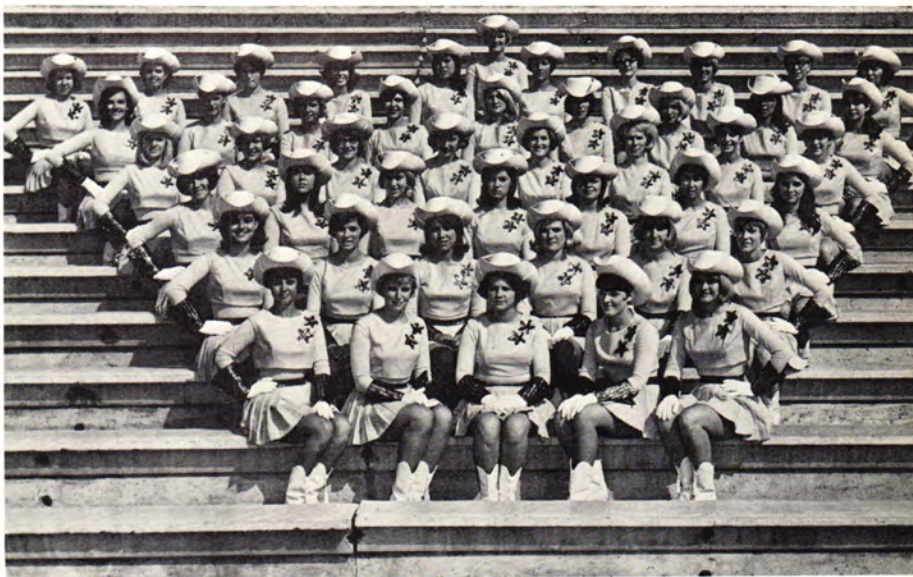

The cafeteria offers college students three well-balanced meals each day.

Students are informed of most activities through announcements in the student union.

# ACTIVITIES . . . .

The Norse Stars, a nationally recognized precision drill team, provide entertainment for numerous activities during the year.

Basketball has become one of the main attractions for college students and area residents.

Football has maintained an enviable record at Northeastern A & M. Nationally ranked annually, the Norsemen play equally strong teams. Other sports offered the student are track, baseball, and golf.

# DYER HALL

Dyer Hall, one of the newest men's dormitories on the campus, houses 160 male students during the school term. The three story structure is one of the most beautiful and modern buildings available.

Rooms in Dyer are comfortable for both study and relaxation.

Not all time in Dyer is spent studying.

The lounge in Dyer offers the students an opportunity for friendly gatherings.

# RUSSELL HALL

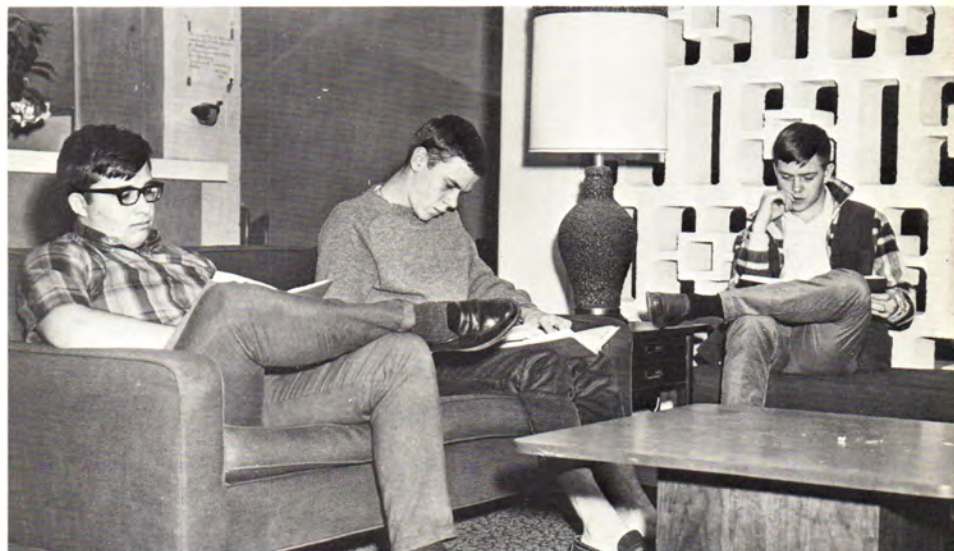

Russell Hall, the most recent addition to men's campus housing, is a three-story, ultra-modern structure which houses 200 students. Student comfort away from home is the main feature of this lovely new dormitory.

The lounge in Russell is a good place to relax and read.

Russell affords the student a place for refreshments.

Students use the lounges in Russell as a place for studying.

# DEDICATION

MR. MERRILL CHANEY

This college annual is affectionately dedicated to Mr. Merrill Chaney, long time vocational-technical teacher at the Northeastern A & M College. Mr. Chaney has two degrees, a Bachelor of Science Degree and a Master of Science Degree from the Kansas State Teachers College at Pittsburg, Kansas. He has additional graduate work at Oklahoma State University.

Before coming to Northeastern A & M, where he has been for the past twenty-one years, Mr. Chaney was Principal at the Hiattville, Kansas Grade School, industrial education teacher and coach at the Cherokee, Kansas High School, and industrial education teacher at Riverton, Kansas High School.

In 1965 Mr. Chaney was selected as "The Teacher of the Year in Industrial Education" for the northeastern section of Oklahoma.

His outstanding achievements have primarily been in the region of his leadership in the Miami Lions Club. During these productive years at the Northeastern A & M College, Mr. Chaney has held nearly every position in the Miami Lions Club and, in addition to being president of the group, was also District Governor of the Lions 3-0 during 1959-60. He serves as International Counselor of the Lions International and is on many of the Lions Club state and national committees. The Lions of Miami have honored him by naming one of their parks the Lion-Chaney Park.

Mr. Chaney has been active during this time in the First Methodist Church of Miami where he is on the Board of Stewards and past president of the Methodist Men's organization.

THE HONORABLE DEWEY F. BARTLETT  
Governor of Oklahoma

STATE OF OKLAHOMA  
OFFICE OF THE GOVERNOR

OKLAHOMA CITY

DEWEY F. BARTLETT  
GOVERNOR

I congratulate the students and faculty of Northeastern Oklahoma A & M College as you complete another year of study and accomplishment.

You are fortunate to be completing your education in Oklahoma at this particular time in our history.

The possibilities for growth and development have never been better. The need for young minds and spirits has never been more pronounced. We are on the verge of major industrial expansion. The groundwork for this expansion has been laid, with the completion of our great system of lakes; with the coming of water navigation in 1970; with the creation of local action groups to assist in the location of industries.

I am confident that more and more young Oklahomans will find their futures in Oklahoma. Whether you graduate now or return to Northeastern A & M for more years of study: Oklahoma wants and needs you and the future is limited only by your vision.

# NEO A&M College Archive Collection

## The Viking – the NEO A&M College Yearbook

Digital copies of The Viking, Northeastern Oklahoma A&M College's annual yearbook, are available in .pdf format on the NEO website for non-commercial purposes only. Scans were created using the best available editions; where stains, color-fading, and contributed marks (usually signatures) were visible on the original they also appear in the digital copy. The edge of some pages in oversized editions may be partially lost due to width limitations on the scanning bed. NEO yearbook editions that do not appear on the website are not part of the collection at present. If you would like to donate a yearbook, please contact the NEO Library.
